

(D) Cross-Subject Functional PCA
High-CC voxels (yellow) cluster in a similar region of embedding-preference space for both subjects,
indicating shared functional organisation despite different voxel counts.

Subject 2 — top-5% voxels (n = 4,713)
Functional PCA of GloVe weight vectors

Subject 3 — top-5% voxels (n = 4,778)
Functional PCA of GloVe weight vectors
